Dear Sir/madam

RE: APPRECIATION OF SPONSORSHIP

From the mentioned above matter, I GIFT JUNGU thank you very much for supporting me at tertiary level. It is very difficult to access funds for tertiary education but you have managed to sponsor me until now and am completing my studies. Am studying at malcolm moffat college of education in "Computer Studies" Secondary diploma for three years. However, now be writing my Final exam in November and am assuring you that am going to make it.

Nevertheless, currently am doing my last teaching practice (TP) at LUKAMBA SECONDARY school in Kapri mposh. Following the current situation in our school I have experienced lots of things with permanent teachers and I have been appointed as a "Computer studies coordinator" so that I can work in hand with Mrs. Muke who is a Head of department (HOD) for mathematics department, this came in when two assistant teachers for Computer studies from mathematics department moved away, one on transfer and other one for studies. HOD sees it difficult to herself to work alone, as a result she recommended me to be helping in Computer software problems and hardware within the school.

However, I thank you very much for supporting me at tertiary education, you have made concrete step in my life.

With thanks,

JUNGU GIFT.
